Coconut Boats

CAYMAN TRADITION

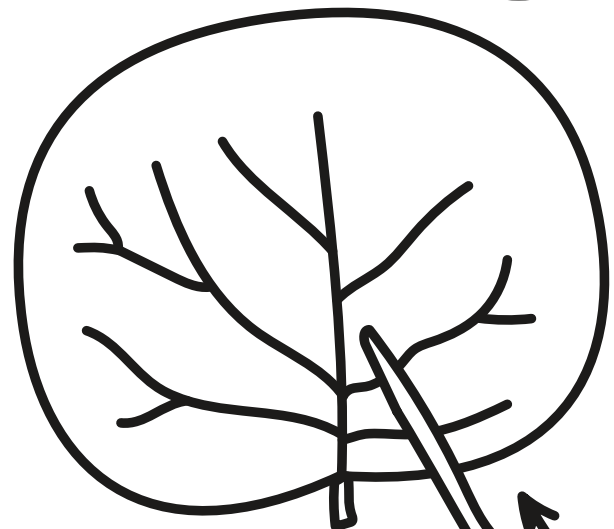

- 1.** Get your parents to help you find coconuts and chop them in half.

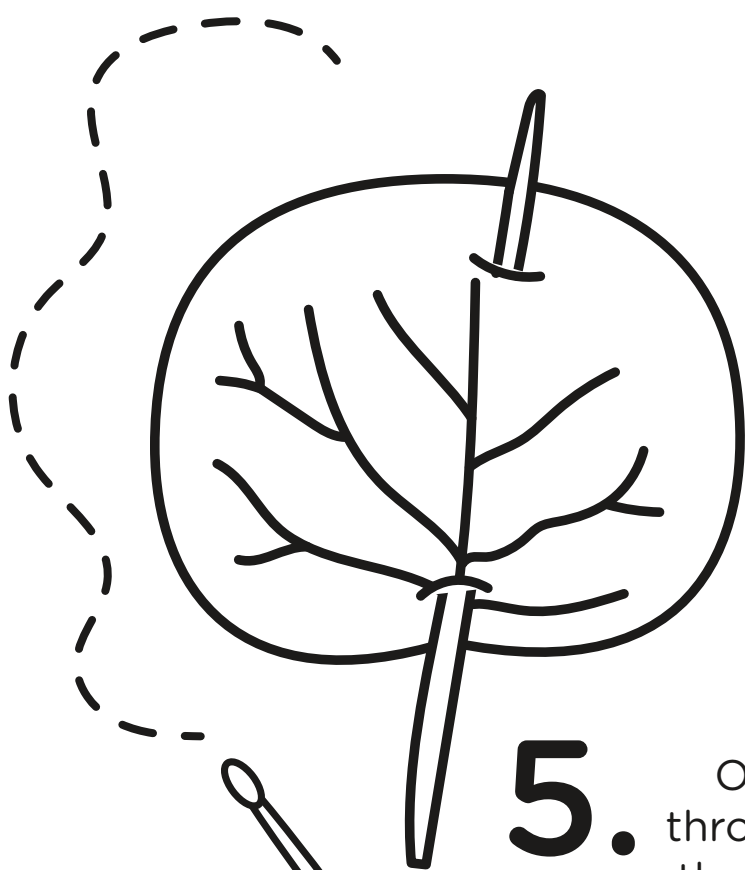

- 2.** Remove the inside of your coconut to make room for your mast and sail.

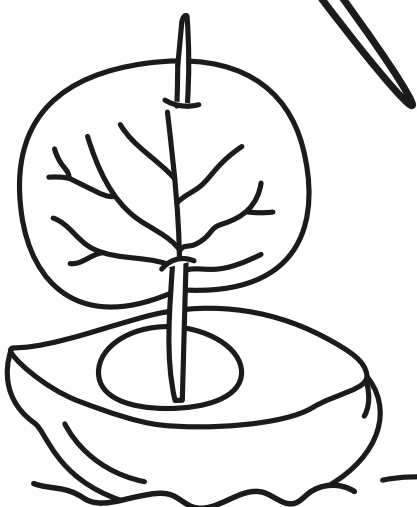

- 3.** Find the perfect twig to be the mast for your coconut boat and remove the leaves.

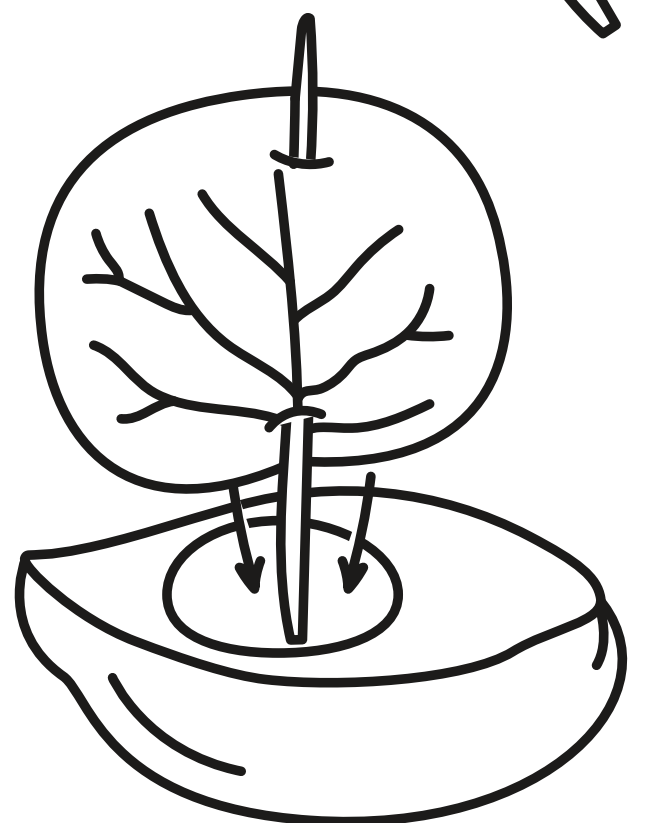

- 4.** Use a sea grape leaf and push your twig through the bottom to make your sail.

- 5.** Once the twig goes through the bottom and through the back, push it through the top back out. Just like sewing.

Happy sailing!

- 6.** Push your mast and sail through the hallowed husk of the coconut.
